

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1. (currently amended) A runway intended to be traveled by vehicles mainly driven by gravity, comprising a supporting structure and a track line structure, said track line structure being sustained by said supporting structure and comprising a number of track sections, said track line structure having an upper start region and a lower arrival region, said start and arrival regions being determined by track sections directly connected to said supporting structure, wherein said supporting structure has a limited extension defining a central region of the runway, and the track line structure includes some said track sections directly connected to the supporting structure and some [[said]] projecting track sections of large extent projecting out of said central region defined by the supporting structure, the runway comprising flexible suspension cables forming rigging systems suspending said projecting track sections of the track line structure from the supporting structure, wherein said track line structure defines a substantially helicoidal path with oval plane.

2. (currently amended) A runway as set forth in Claim 1, wherein said cables forming said rigging systems which support said projecting track sections ~~of the track line structure~~ have an extension which can be regulated.

3. (previously presented) A runway as set forth in Claim 1, wherein said supporting structure substantially forms a pillar.

4. (previously presented) A runway as set forth in Claim 1, wherein said supporting structure comprises a substantially vertical mast, substantially horizontal extensions projecting from said mast and uprights extending from said extensions, said extensions and uprights supporting said track sections by means of said rigging systems.

5. (canceled)

6. (original) A runway as set forth in Claim 1, intended to be used as a game, wherein both said supporting structure and said track line structure comprise modular elements forming a system of composable modular elements.

7. (canceled)

8. (previously presented) A runway as set forth in Claim 1, intended to be used as a game, wherein both said

supporting structure and said track line structure comprise modular elements forming a system of composable modular elements.

9-24. (canceled)
